↑ SPICE IT UP

Ruvati injects striking color into the gray world of stainless steel with the new collection of Terraza modern farmhouse sinks. Metallic tones from bronze and copper to gunmetal add a sophisticated pop of color to any style kitchen. Built with superior construction including matching color strainer and heavy-duty SoundGuard, which muffles dishwashing “clinks” and other tasks. northernstone.com, ruvati.com

→ NATURAL WARMTH

Cabinets, in their natural state, with no paint or colored stain applied, are a great choice for those looking to add a rustic-refined touch to create a warm, inviting look in your home’s most hardworking space. Natural wood allows flexibility in other finishes and when combined with modern appliances and clean design it makes a beautiful design statement. shopthelightinggallery.com

← WARM METAL ACCENTS

Add a sleek and modern touch to any space by incorporating metals into your kitchen area. Consider your overall design style. For a more traditional design style, you may want to opt for brass or copper accents. For a modern kitchen, consider stainless steel or blackened steel accents. Copper pots, metal hardware and metal lighting fixtures are easy ways to start. durasupreme.com, design by Mariotti Building Products
