What's New, What's Next

Function & Flair

Integrated workstations and flexible faucet features in warm, diverse finishes create a functional statement in the kitchen.

BY ELIZABETH RICHARDS

MUCH OF THE hard work in the kitchen occurs in the sink area, making functionality a top priority; a utilitarian look, however, will not suffice. In addition to promoting convenience and efficiency, the sink area needs to align with the room's overall aesthetic.

"As kitchens shift toward more layered, collected and thoughtfully composed spaces, homeowners are selecting sinks and faucets with greater intentionality. These fixtures are increasingly seen as design elements that support the broader look and feel of the kitchen," stresses Brit Angelesco, exec. v.p. at ZLINE Kitchen & Bath, based in Reno, NV.

"Design must integrate with the rest of the kitchen look: whether that's industrial loft, organic-modern or transitional. Finishes, shapes and even materials are chosen to match the cabinetry, appliances and hardware," explains Cody Stephens, creative director at Vincennes, IN-based Karran USA.

"Homeowners are more willing to select bold finishes, accent colors or mixed-metal hardware because they view faucets and sinks as design statements, not just functional pieces," he adds. "There's also a shift from ephemeral trends toward longer-lasting style. Homeowners want fixtures that still look current five to 10 years from now, so designers are choosing clean, smart forms and quality materials."

The sink area has transformed into a larger, multifunctional area, leading to the rise in popularity of workstation sinks and multifunctional faucets.

Available as a kitchen faucet and a prep faucet, the Classic-H collection from **Franz Viegener** bridges the gap between professional-grade performance and timeless home design, notes the firm. The design showcases a gracefully arched silhouette.

The K225 Faucet, part of **Lenova's** Design Edition Collection, offers both a pot filler and a pull-down dual-function spray head. The faucet features 360-degree rotation, magnetic docking, a ceramic valve cartridge and PVD coating. It is crafted from 304 stainless steel with zero lead content.
lenovagroup.com

Dornbracht's META SQUARE collection features a square spout elbow, in a single-lever mixer, pull-down or bar tap. Finishes include shiny or brushed Chrome, Platinum, Champagne 22kt Gold and Durabross 23kt Gold, as well as Dark Chrome, Brushed Dark Platinum and Matte Black.
dornbracht.com

"Sinks are no longer just for cleaning dishes: they have transformed into all-in-one workstations, with multiple functionalities and customizable accessories like sliding cutting boards and colanders," remarks Jean-Jacques L'Henaff, leader, LIXIL Global Design, Americas, based in New York, NY. "They are also growing in size and, when filled with ice, transform into sophisticated bar stations for entertaining."

Finishes are moving towards warmth and variety. "We're seeing more interest in finishes and materials that complement mixed-material cabinetry, warm woods and softer, matte surfaces," Angelesco reports.

Other trends include nature-inspired elements, clean and simple design and technological features that promote efficiency, cleanliness, sustainability and health, according to manufacturers recently surveyed by *Kitchen & Bath Design News*.

DUAL ROLE

While a functional sink area is paramount, and many trends center around high performance, manufacturers note that those aren't the only considerations.

Jennifer Morgan, sr. channel manager, retail and consumer insights for Pfister Faucets, based in Lake Forest, CA says, "[There's a] persistent emphasis on products that blend joy with daily function, offering both emotional appeal and everyday usefulness," she observes.

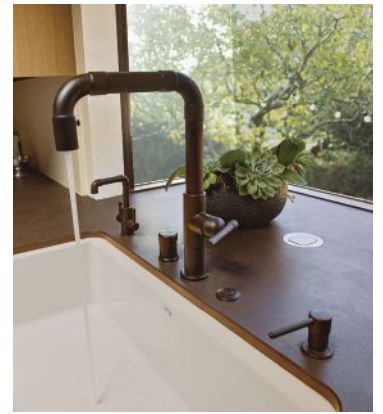

Blanco has introduced INTEOS, a workstation sink system with adaptable accessories that can be neatly stacked, or stored below the sink with the INTEOS Organizer Bag. The sink is offered in 30", 33", 39" and 45" options, in stainless steel or SILGRANIT, in a range of nature-inspired colors. blanco.com

Kitchen faucets from **Watermark Designs** are made to order and offered in a range of styles, including mono-blocks, pull-out sprays, pull-down sprays, instant hot and filtered water dispensers, prep faucets and pot fillers. The company offers a total of 16 collections as well as ancillary pieces. watermark-designs.com

Premier Copper Products' collection of artisan-made copper kitchen sinks is available in a variety of sizes and configurations. Shown is the 33" Hammered Copper Apron-Front Single Basin, a piece defined by its hand-hammering and timeless design, notes the firm. Custom options are available. premiercopperproducts.com

Sonoma Forge has upgraded its Brut Series with a dual-function pull-out spray. The ergonomic design features a concealed switch, and the vertical joystick handle moves right to turn on the water and forward to adjust the temperature, so it can be mounted close to the backsplash. sonomaforge.com

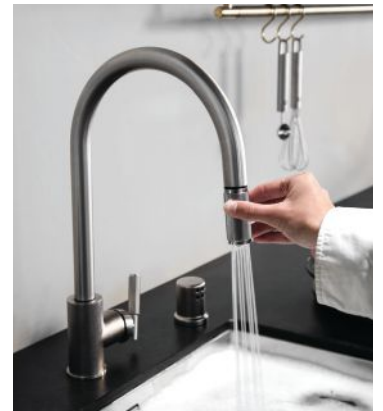

The ROHL Apothecary Kitchen Collection by **House of Rohl** draws its inspiration from the shapes of old apothecary bottles. Designer Xander Noori looked to the past for inspiration with chamfered details, beveled edges and balanced arcs, resulting in a nuanced, elegant simplicity, notes the firm. houseofrohl.com

TopZero's Vera Deluxe workstation sink offers three installation options – flushmount, elevated-mount and undermount – and is the first sink with an integrated LED-light system, the company states. Its built-in drawer provides storage for the accessories, creating a fully equipped workspace. topzero.com

The Beringer Pull-Down Kitchen Faucet's signature ribbon spout design is an architectural profile that captures the elegance of moving water, states **Pfister Faucets**. Beringer features TopPfit technology for above-deck installation and MagnePfit for secure spray-head docking. pfisterfaucets.com

The **Buster + Punch** dual-spray pull-out faucet features solid metal composition that includes a rough-cast body. The CNC-machined linear or cross knurled lever and spray head are refined by hand. The faucet is available in four metal finishes: Steel, Brass, Gun Metal and Welders Black. busterandpunch.com

"The modern kitchen still holds its place as the heart of a home's lifestyle and continues its role as a multifunctional space," L'Henaff offers. "However, today's customers are demanding products that truly live up to this expectation, integrating both uncompromising efficiency for everyday cooking and stunning aesthetics for effortless entertaining. This elevated standard is driving both sinks and faucets to the next level."

"Overall, the trend is toward fixtures that make the kitchen more efficient, more enjoyable to use, and visually unified without drawing unnecessary attention," explains Angelesco.

"The most significant new development is the shifting role of the primary sink due to the rise of the 'Scullery' or 'Dirty Kitchen,' where heavy cleanup duties are moved to a hidden prep room, allowing the main kitchen sink to become a smaller, more social feature," reports Abbas Imtiaz Poonawala, CEO at Flusso Kitchen & Bath Company, based in Dallas TX.

Melike Hocaoglu, director-key accounts for TopZero in Fort Lauderdale, FL adds that homeowners look for products that combine trends with quality, durability, design and real functionality. "When a trend also solves practical needs, the decision is easy," she asserts.

INTEGRATED WORKSPACE

The growing interest in convenience and efficiency has led to the emergence of workstation sinks, which save space while enhancing the

functionality of the sink area.

"Functionality continues to drive innovation," explains Sally Edenfield, brand strategist for Austin, TX-based Ruvati. "Workstation sinks are now a central feature in modern kitchens, allowing users to prep, wash and dry in one organized space."

"Homeowners are gravitating toward workstation-style sinks with large basins and integrated accessories that streamline prep and clean-up while reducing clutter on the countertops," Angelesco says.

A seamless look is important, whether the choice is a farmhouse, undermount or a fully integrated sink.

Jake Khoury, general manager at Nantucket Sinks USA, in North Kingstown, RI says that while farm sinks have been a strong element in the kitchen for a very long time, the company now sees a trend toward undermount sinks in all materials. And, there are some shifts in the typical choices. For example, Khoury notes, modern kitchens may use a matte black farm sink rather than white for a more modern look, or include a more elaborate stainless steel sink with multifunctionality or built-ins.

Poonawala agrees, saying, "The farmhouse (apron-front) aesthetic also persists but is evolving beyond white fireclay into modern materials like matte stainless steel and stone." Designers are also increasingly using "integrated sinks" constructed from the same material as the countertop for a rimless, seamless look, he adds.

Zip Water's HydroTap Celsius Plus is an all-in-one tap that instantly dispenses boiling, chilled and sparkling filtered water. It is sustainably designed with a minimalist silhouette, antimicrobial touchpad and under-counter filtration system. us.zipwater.com

The Rivera Smooth Brass Bar/Prep Sink from **Thompson** is handcrafted and finished in the company's signature semi-Satin Brass with a sleek, smooth finish. The resulting design maintains the proportions of the original model yet is more accessible for a variety of homes and design aesthetics, notes the firm. thompsontraders.com

The Synthos Workstation Sink by **Kohler** is crafted from 16-gauge stainless steel with SilentShield Plus sound absorption. It features multi-level ledges and a range of integrated, chef-inspired accessories, from solid wood cutting boards to stainless steel colanders and serving trays. Sizes range from 30" to 72". kohler.com

The Velox collection from **Flusso** includes the K.1800 Kitchen Faucet, a semi-professional-grade model with a pull-down spout and a dual-function sprayer with extended reach, the B.100 Bar Faucet and the F.1800 Filter Faucet, compatible with reverse osmosis systems. The collection is offered in Stainless Steel or Brushed Gold PVD finishes. flussofaucets.com

Bocchi's 1694 Sotto Step-Rim Double Bowl is made of natural organic fireclay, and may be installed as an undermount, drop-in or with an 1 1/16" semi-reveal that creates a dual workstation sink ledge suitable for use with select accessories. The sink is pictured here in Matte Black with Brushed Gold accessories. bocchiusa.com

Karran USA's Matrix 32" Undermount Workstation Sink, built from 16-gauge T304 stainless steel with an embossed hex-pattern finish, is scratch-, stain- and fingerprint-resistant, notes the firm. The dual basins maximize prep and cleanup flexibility, while the integrated workstation ledge supports included accessories. karran.com

Part of the Ezra Kitchen Collection by **Peerless Faucet**, the Single-Handle Pull-Down Kitchen Faucet is available in Matte Black, Chrome and Stainless Steel. The faucet features POWERinse Technology for an extra boost of cleaning power and has an ergonomically designed handle. The high-arc gooseneck design swivels 360 degrees. peerlessfaucet.com

The **Delta Faucet Co.** Clarifi Tankless Reverse Osmosis System is certified to filter out more than 90 contaminants, including microplastics, total pfas, lead, arsenic, chemicals, pharmaceuticals, nitrates and heavy metals. Easy to install and maintain, the tankless system is certified against National Sanitation Foundation (NSF) standards. deltafaucet.com

"There is a major new trend reshaping kitchen sinks and faucets, and it centers on seamless, modern integration," offers Hocaoglu. "For years, kitchen design has evolved toward cleaner lines, minimalist cabinetry and built-in appliances, yet the sink category stayed largely unchanged."

TopZero's patented flush-mount sinks have changed that, she remarks. "Designers and homeowners want kitchens that feel continuous and effortless, and our technology finally brings that seamless aesthetic to the sink area. The installation creates a sleek, unified surface – much like the visual effect of an infinity pool – eliminating the visible rims, gaps and silicone lines that have defined traditional sinks for decades."

NATURAL SIMPLICITY

Overarching design trends have been moving towards clean, simple lines and influences from nature, which also impacts sink and faucet choices.

"Consumers are prioritizing biophilic greens, neolithic neutrals and finishes that deliver a calming, organic feel," states Morgan. "Cleaner, quieter forms, such as simple, organic faucet silhouettes, align with the trend toward serene, restorative spaces."

"Broader interior design movements are heavily influencing hardware, particularly through biophilic design, which favors organic curves and earthy sink tones to complement natural wood and stone environments," reports Poonawala.

"Kitchen faucets are moving toward simpler, cleaner aesthetics, which in turn, are easier to clean," says L'Henaff. "This focus is closely tied to the broader health and wellness trend established during COVID, which made home cooking and maintaining a sanitized environment top consumer priorities."

Edenfield agrees that clean lines, deep single basins and professional-style pull-down faucets are still preferred for both residential and commercial-inspired kitchens.

FLEXIBLE FUNCTIONALITY

Faucets with a simple, clean look and high capabilities are a top trend, manufacturers say. "[There's a] rising interest in modern, future-forward styling, including simple, organic faucet shapes," notes Morgan. She adds that there's been a shift toward flexible functionality, including pull-down sprayers, pivoting spray heads, touch or touchless activation.

"Overall, the continued preference is for clean lines, simplicity and easy maintenance," stresses Hocaoglu. High-arc designs and pull-down sprays are faucet trends that continue to be in demand, she adds.

"Dual faucets and multi-function spray heads continue to gain traction for their convenience and ability to elevate workflow," reports Angelesco.

"Pull-down/pull-out spray faucets remain very popular for versatility in both prep and cleanup," Stephens concurs. He adds that features like

The **VOLA** KV1M-500MT1 suite, available from **Hastings Bath Collection** combines a one-handle mixer with medium lever and double swivel spout with water-saving aerator, alongside a complementary 500 series one-handle mixer featuring a medium lever and T1 hand shower. The KV1M-500MT1 is available in nine colors. en.vola.com

Artisan-made from marine-grade stainless steel, the COTO Series from **California Faucets** features four distinct handle options. The durable new series, seen here in Satin Bronze (PVD) finish with textured paddle handle and pull-down sprayer, is available in seven artisan finishes, including extra-strong PVD options. calfaucets.com

The **GROHE** Blue Chilled & Sparkling 2.0 Water System transforms ordinary tap water into drinking water by removing impurities and enhancing flavor, notes the firm. The three customizable water options include Chilled, for ice-cold still water; Medium, for lightly sparkling water, and Sparkling, for fully sparkling water. grohe.us

Moen's Luxe Chef Workstation System Sinks are made from 16-gauge heavy-duty stainless steel with Moen's SoundSHIELD technology. The space-saving design features an exclusive under-sink pullout storage bin to keep accessories organized. moen.com

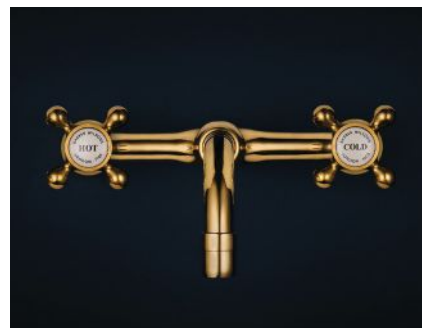

Crafted from marine-grade stainless steel, the latest addition to the Odin Kitchen Collection from **Brizo** is designed to withstand the rigors of outdoor use. The Odin Outdoor Kitchen Faucet features a 360° swivel spout, InnoFlex PEX supply lines to minimize potential leaks and the company's patented DIAMOND Seal Technology valve. brizo.com

The AW-PS-3219-16 All-Weather Undermount Outdoor-Use Stainless-Steel Prep Station Sink from **Nantucket Sinks** is constructed from corrosion-resistant 316 marine-grade stainless steel. It includes a stainless-steel grid to protect the basin, a stainless-steel kitchen sink drain and an HDPE cutting board that fits over the sink. nantucketsinksusa.com

Elkay's Circuit Chef stainless steel workstation sink includes upgraded custom-fit accessories that slide from side to side, including cutting boards that can be used as an extension of the countertop. It features undermount installation for a clean look, premium 16-gauge stainless steel for durability and a roll-up drying rack. elkay.com

Barber Wilsons & Co.'s Regent 2020 is a wall-mounted bridge kitchen faucet available in standard finishes as well as new Brushed Gold, Satin Copper, Brushed Copper, Polished Copper, Matte Black, Matte Bronze and Weathered Bronze. The indices are offered in white, natural or black ceramic with the option of matching metal finish. barberwilsons.com

touchless activation, voice control, built-in filtration for drinking water, and instant hot, chilled and sparkling water features are popular.

WARMTH AND DIVERSITY

Sink and faucet finishes continue to move toward matte looks and warmer tones, though classic finishes like stainless remain popular as well. There's also a trend toward varied textures and mixed metals, adding visual interest.

"The finish and material choices for sinks and faucets are evolving toward richer, more varied palettes and textures, while still retaining the durability and practicality that kitchens require," states Angelesco. "Warm metallic tones such as brushed bronze, soft brass, even polished copper are making a comeback, often combined with matte or satin bases to bring depth and a more designed feel to the kitchen."

Morgan believes the matte black finish continues to replace the more traditional Tuscan bronze in many settings, and there's continued traction for both brushed gold and champagne bronze, especially in modern designs. Gunmetal is also gaining visibility as an emerging modern finish, she adds.

There's also strong interest in natural materials and finishes that "help bring the outdoors in," Morgan reports. She sees increased use of metallic accents and finishes that complete nature-inspired or contemporary looks.

Stephens agrees that matte black is holding strong, but also says the company sees growth in warm metallic finishes. Darker tones and colored sinks,

such as concrete and grays, are becoming more acceptable, even desirable, he notes. "Combining finishes, for example matte black with wood accents, or mixing brushed gold and gunmetal gray, is an aesthetic trend," he adds.

"Finishes such as brushed gold, gunmetal and matte black remain top picks, as more homeowners are matching faucet and sink finishes for a cohesive look," remarks Edenfield.

"There is a strong movement away from polished chrome toward matte and textured finishes that introduce warmth, with matte black and brushed gold or champagne bronze serving as the most popular choices, often paired together in 'mixed metal' designs," says Poonawala.

"Gold finishes such as brushed brass and vibrant gold are unequivocally 'in,' and bring a touch of timelessness to kitchens," stresses L'Henaff. "We're seeing a more intentional mix of color and materials that blend cool and warm metal, stone, glass and textures across fixtures and hardware. While mixing metals is on-trend, the high-contrast pairing of matte black and gold is fading and making way for tone-on-tone combinations that evoke a more restrained style."

HIGH-PERFORMANCE MATERIALS

Durable materials that can withstand frequent use are in high demand.

"While bronze and gold tones appear more frequently in decorative projects, stainless steel remains the preferred choice for most designers

Newport Brass has introduced six new trigger spray, pull-down kitchen faucets available in the Jacobean, East Linear, Muncy, Seager, Taft and Chesterfield collections. The trigger spray allows users to toggle between a powerful stream and a spray and a partial combination of spray and stream. newportbrass.com

Designed in a 33"x19"x10" size, the undermount Workstation Sink from **MSI** is made from 16-gauge stainless steel with a satin finish. The sink features a fully undercoated interior for sound absorption and includes a suite of accessories: a cutting board, colander, rolling mat, grid and strainer. msisurfaces.com

The Galley is the Original Workstation sink and is a complete culinary system where the user can prepare, cook, serve, entertain and clean in one central place. Each Galley is thoughtfully designed, engineered and handcrafted in the U.S., and includes a range of accessories, states the company. thegalley.com

The Bianca Faucet from **Ruvati** features a flexible 20" pull-out sprayer. The stainless steel and brushed nickel finish complement Ruvati sinks and other stainless fixtures, notes the firm. The solid metal body and high-performance ceramic disc cartridge ensure reliable function over time, the company adds. ruvati.com

The Torak Collection from **Kraus** features twisted lever handles with circular inserts. Offered in three spout styles – rounded gooseneck, flexible spring and rectangular spout – the faucets incorporate Reach Technology, a two-function pull-down sprayer, and a smooth swivel adapter. kraususa.com

Speakman's Neo kitchen collection brings an industrial edge to the sink with a spring-style pull-down faucet in a warm Brushed Bronze finish. The high arc profile and flexible spray head offer generous reach. Neo is available as a standard pull-down, spring or sensor model in multiple finishes. speakman.com

The UPC Certified Apron-front/Farmhouse single bowl sink from **Hard-ware Resources** is hand-made from 16-gauge stainless steel. The large single bowl with 15-degree radius corners accommodates large pots and pans, and has an added layer of insulation on the bottom to reduce sound. hardwareresources.com

Native Trails has added Pacifica 30 to its NativeStone collection. Pacifica 30 is available in six finishes, including the new Sand. Designed for undermount installation, the 30" concrete sink features clean lines and a deep interior basin. To protect and enhance the sink's surface, NativeStone Shield is applied. nativetrailshome.com

and homeowners," observes Hocaoglu. "It's the neutral, authentic raw material that complements any kitchen style and offers long-term durability."

Poonawala, on the other hand, notes, "In terms of materials, dark granite composite sinks in shades of charcoal and greige are surging in popularity to challenge stainless steel, prized for their dramatic aesthetic as well as their superior ability to hide water spots and resist scratching."

Edenfield sees demand for both. "For kitchen sinks, granite composite remains popular for its natural texture and strength, while stainless steel stays a classic for its durability and clean look," she says.

VERSATILE ADVANCES

Technology impacts trends in kitchen sinks and faucets in a number of ways, including increasing functionality and boosting wellness benefits.

"Technology continues to shape how people interact with their kitchens and bathrooms, driving new levels of convenience, versatility and hygiene. Innovations such as touchless faucets, and thoughtful engineering, including ergonomic pull-down sprayers and integrated accessories, are helping sinks and faucets deliver greater functionality for everyday living," says Angelesco.

"Functionality is enhanced through features like multi-spray faucet heads and hands-free operation, offering greater user convenience," L'Henaff states. "Additionally, the trend toward improved water quality

and the consumer focus on health and wellness is accelerating the adoption of integrated filtration systems."

Stephens agrees that technology is impacting current trends, including demand for touchless and voice-control faucets, built-in water filtration, integrated workstation designs, and features such as low-flow aerators, efficient drain design, and materials that incorporate recycled content.

"Technological innovation has shifted from novelty to practical hygiene and wellness, most notably through the use of hydrophobic nano-coatings on sinks that repel oil and water to minimize bacteria buildup and simplify cleaning," observes Poonawala. "Faucet technology is also advancing with highly reliable touchless motion sensors becoming standard, while 'water stations' – faucets that dispense instant boiling, chilled or sparkling water – are increasingly replacing kettles and pitchers to streamline kitchen workflows."

"Innovations in materials, manufacturing and installation methods are pushing the industry toward more seamless, hygienic and design-forward solutions," stresses Hocaoglu.

Morgan reports that there's a growing focus on water management through smart technologies, including leak-detection systems, app-enabled controls and demand for durability and sustainability influenced by heightened consumer environmental awareness. ■

29. Karran USA's Matrix 32" undermount double bowl workstation sink is constructed from 16-gauge T304 stainless steel to resist scratches and stains, with each bowl reinforced with a signature embossed hexagonal pattern on all interior walls, boosting structural integrity and reducing visible wear from everyday use. An integrated workstation ledge system delivers a fully functional prep zone, complete with a wood fiber cutting board and a roll-up drying rack.
karran.com

30. Curation from Marazzi is a terrazzo-inspired series that offers a bold selection of colors in an assortment of sizes and styles. The tile is offered in sleek 2"x9" brick as well as a retro look with splatter designs available in large formats and mosaics. Designed for versatility and durability, the splatter floor tile is available in polished and matte finishes.
marazziusa.com

31. Lucia is a new solid surface bathtub, part of the Aria Stone Collection from Fleurco. Featuring a built-in shelf, the tub offers a spacious interior, and trim in Chrome, Dark Chrome, Brushed Nickel and Brushed Gold. The oval tub is available in Matte Black or Matte White.
fleurco.com

32. The SKS 30" Transitional Series Combi Wall Oven uses a built-in camera to recognize ingredients and suggest recipes in real time. Its steam-assist convection preserves food quality, while the speed oven eliminates preheating, notes the firm. The oven is part of the brand's Transitional Series, which features a Satin Stainless Steel finish and sleek, modern handles for a contemporary look.
sksappliances.com

33. NatureKast Weatherproof Cabinetry has debuted Eclipse, its newest door style that reinterprets the classic Shaker style with a narrower frame. Cast from rift-cut oak, it showcases the wood's linear grain and rich texture, with inset panels with vertical grain that highlight the clean, modern lines of the doors and drawers. Eclipse is fully weatherproof and crafted to resist moisture, heat, cold and UV exposure and is available in a wide range of finishes and colors.
naturekast.com

34. Now available in a second finish, Honey Oak, the Laurent Collection by James Martin Vanities is a modern interpretation of mid-century design, featuring rounded picture-frame detailing and cathedral grain ash veneers. The original finish, Light Natural Oak, showcases a soft, airy tone, while the new Honey Oak finish offers a warm, golden hue, states the firm.
jamesmartinvanities.com

35. Ruvati's new Ibiza 32" Glass Rinsing Workstation features built-in jets that rinse drinkware thoroughly, notes the firm. Unlike other glass rinsers that require extra countertop space and additional holes for installation, the Ibiza's design integrates the rinser directly into the sink. The shape and angle of the rinser allow water to drain directly into the sink without taking up any bowl space.
ruvati.com

36. New from Kesseböhmer USA, ChefsTable is a heavy-duty appliance lift designed to support up to 42 lbs. of countertop kitchen equipment. With a smooth swing-out mechanism and effortless return, it keeps countertops clear while providing instant access to stand mixers, air fryers and more, states the company.
kessebohmer.us

37. The Studio Haven collection by American Olean is inspired by the look of handcrafted tiles. Offered in a variety of colors and sizes, this series showcases distinct variations in tone and shade. Designers can create modular patterns with the 4"x4" and 4"x12" sizes, add depth with a glossy picket mosaic, or opt for a matte hexagon mosaic, which works for the shower floor.
