ROBERN SCULPT HANGING LIGHT MIRROR

ROBERN'S NEW LIGHTED MIRROR IS A FUNCTIONAL STATEMENT PIECE FOR ANY ROOM OF THE HOUSE.

Robern has unveiled its new Sculpt Hanging Lighted Mirror, a sleek and functional focal point that is bold in its design. Designed to accommodate ceiling heights up to 11 feet, the mirror is offered in two structural forms, Arch and Pill, and can be installed vertically in any room of the house.

The Sculpt Hanging Lighted Mirror is handcrafted and polished in the United States and is available in three finishes: Matte Black, Polished Stainless Steel, and Brass.

RUVATI DUAL-TIER PRO COLLECTION

A NEW WORKSTATION SINK FROM RUVATI HAS AN ELEGANT FINISH AND AN ARRAY OF ACCESSORIES TO ENHANCE VERSATILITY.

Ruvati's newly unveiled Dual-Tier Pro Collection introduces a pair of new finishes to complement your workstation sink: Matte Gold and Gunmetal Black. These finishes offer a sleek, modern aesthetic to enhance your kitchen, while also introducing rounded corners and a two-track sliding system to expand the range of activities that can be performed at the sink.

The collection features a mix-prep station with a solid wood platform that spans the basin of the sink, as well as a matching colander and lid with grater/slicer attachments. A hardwood cutting board, two stainless steel colanders, and a folding drying rack are also included.

The Dual-Tier Pro Collection is compatible with Ruvati's LedgeFit collection, offering more than 40 accessories for increased functionality. Workstations are single-bowl designs with 33- and 45-inch configurations, with a 10-inch

depth and one-inch slope on the basin bottom. The workstations are made from 16-gauge premium T-304 stainless steel with a commercial-grade brushed finish that is scratch-resistant, and Ruvati says, simple to clean. They also feature a sound-deadening coating with thick rubber padding to minimize noise while in use.
