Induction range offers precise heat distribution

FISHER & PAYKEL launches its Series 11 48-inch Professional Induction Range. The full induction range provides a new level of precision, power and control with its ultra-responsive induction cooktop and two independently operated oven cavities. Offering consistent and precise heat distribution, the ceramic cooktop features six induction cooking zones for ample space and flexibility. Two of the zones can be paired to form SmartZones that support larger cookware. | fisherpaykel.com

Kitchen cabinets assemble in less than 1 minute

MAKELLOS CABINETRY introduces its latest collection, EVÖK Collection x eRTA Cabinet, to offer a new enhanced user experience. The collection features Threespine Core's revolutionary click furniture technology, which allows the brand to make kitchen cabinets that are assembled in less than a minute—or to be more exact, in less than 40 seconds. Threespine Core click furniture technology, patented by Välinge Innovation, eliminates the need for tools, screws, nails and glue. | makellos.com

Refrigerator, freezer sets new standard

GAGGENAU debuts a new refrigerator-freezer that combines sophistication and functionality. The appliance enhances living spaces with integrated, furniture-like appearance, striking materiality and adaptive lighting. The dark brushed stainless-steel interior and aluminum-framed drawers showcase contents. Opening the appliance activates warm-white, glare-free lighting that adjusts to ambient conditions and intuitively with drawer interaction to dim surrounding compartments. gaggenau.com

Induction cooktop delivers power, precision, speed

SIGNATURE KITCHEN SUITE presents its Energy Star-certified 36-inch Flex Induction Cooktop, which features a powerful dual-center induction element to deliver 7,000 watts of power, precision and speed for daily cooking needs. Available in both 36- and 30-inch configurations, Flex Induction Cooktops are engineered to complement any wall oven and can be mounted flush for a sleek appearance that blends seamlessly with countertops or installed proud for a quick, easy retrofit. signaturekitchensuite.com

Geometric design keeps kitchen sinks looking new

RUVATI combines style and practicality with its latest design innovation: HexBottom sinks. The technology brings an embossed finish to stainless steel sink bottoms that is both beautiful and functional. The etched geometric print manifests as a subtle texture that protects against surface scratches and daily wear. Gravena Hex is an undermount sink with a deep rectangular basin and curved corners; Roma Hex is a workstation sink with built-in ledge to accommodate accessories. ruvati.com
