LARGO SHOWER TRAYS

New horizontal drain and barrier-free installation.

Acquabella breaks with tradition by placing the drain on the tray's longest side with their new LARGO shower tray. This strategic shift creates more options for installation configurations and adds a gentle slope as a subtle design element. The LARGO COLLECTION is offered in a range of versatile sizes and is crafted of engineered stone. The non-slip surfaces make for a safer shower environment and are incredibly durable and easy to maintain. The collection is available in five color options and two textured finishes - Slate finish which mimics the effect of natural stone, or Beton which imitates the look of cement. Their low profile design makes the shower easily accessible for all with a quick and easy recessed installation for flush-to-floor fit or standard with a small lip. acquabella.us
